

Our brands reduce hairfall, remove worry lines, and care for your heart. Just like our quarterly results.

While the financial meltdown has shaken world economies, Marico stands unshaken through all the turmoil and uncertainty. Continuing to do what it does best: growing its businesses and brands consistently. In its own distinct way - by challenging the status quo and pushing the boundaries of its existing businesses. Transforming from a pure oils player to one focussed on beauty and health. From a purely Indian firm to a global entity. From a 'product' to 'solutions' provider. Growing markets, growing categories, and winning several accolades along the way. Some call it success. We call it Uncommon Sense.
