

When you're rated among India's most innovative companies, you get predictable.

Winning awards seems to have become a habit with us. Rated among India's most innovative companies in a Business Today-Monitor Group Survey. Awarded Best Business Leader for FMCG in Personal Hygiene by NDTV. Rated among the top 8 Indian Global Challengers by Standard & Poor. India's Employer of Choice. And many more. If we're one of India's fastest growing FMCG companies today, it's thanks to our unique mindset: 'uncommon sense'.

By challenging the prevailing rules of the marketplace and defying convention with unconventional thinking, we're able to unlock new value and stretch our growth horizons. Our results, as you can see, are predictably good.
